OpenStack and Open Compute

Houston OpenStack MeetUp Jan 2016

January 2016

**Dexter Fryar – Hyperscale Engineering Program Manager
Shahzada Sufyan (Sufy) – Product Management**

Hewlett Packard
Enterprise

Outline

About me

Intro to OpenStack & Open Compute

Industry Trends

Devstack Demo on OCP hardware

Hewlett Packard Enterprise

About me

- 15+ years at HP in systems software engineering roles
- Worked on internal and external embedded storage subsystems
- Heterogeneous solutions engineering
- Joined HP OpenStack engineering in 2011
- Worked on several OpenStack foundation service projects metering and billing, ceilometer, monitoring
- Currently in Hyperscale Engineering

About me

Sufyan Shahzada is Group manager, HP Servers at Hewlett-Packard Enterprise

In his role, Sufyan leads the product management and Sales Enablement of HP Server solutions for Service Providers.

Most recently in his role, Sufyan led the product management for HPSD MSA Storage Arrays, Disk Enclosures and Storage Networking Switches.

Sufyan has over 20 years of technology industry experience and has held a variety of management positions in product management and business development at Hewlett-Packard in the US and in India.

Sufyan holds a B Tech degree in Electronics and Telecommunication.

Hewlett Packard
Enterprise

Intro

- **OpenStack Distros vs. Roll Your Own**
- **Automation CI/CD**
- **OCP Hardware**
- **Scale out solutions**

Hewlett Packard
Enterprise

Open Infrastructure for Service Providers

HP Cloudline - open and cost-focused platforms for web scale

Rack scale systems

Full, rack scale platforms optimized for the **largest cloud datacenters** and built on **open industry standards**

OPEN
Compute Project

Dense multinode servers

Innovative, **density optimized platforms** for 2P, 1P and SoC designs to deliver superior efficiency and **lowest per node cost**

Bare iron rack servers

New, lowest cost rack mount servers in the HP portfolio that are **cost optimized for large-scale deployments**

**Hewlett Packard
Enterprise**

OCP Hardware

OCP Network Adapter

OCP Compute Sleds

HPE Cloudline CL1100

HPE Cloudline CL2100

HPE Cloudline CL2200

Enterprise**

CL7100 Open Rack

| | |
|-----------------------|--|
| Processor | 2x Intel Xeon E5-2600 v3 up to 120W |
| Chipset | Intel C610 PCH |
| Memory | 16x DDR4 DIMM slots @ up to 2133 MHz |
| Network Module | 1x 1GbE embedded NIC 10GbE SFP + NIC via Mezz |
| IO Expansion | (2) PCIe 3.0 LP (1 x8, 1 x16) (1) OCP 10GbE Mezzanine |
| Drive Support | Up to 6 SFF NHP SAS/SATA (1) M.2 NGFF module |
| Management | ASPEED 2400, IPMI 2.0, KVM Support |
| Power | 12KW power shelf, single zone |
| Chassis | 21" Chassis |
